

## DESCRIPTION:

The HV6 is an in line headphone volume control. It accepts a stereo headphone level and allows the user to attenuate the volume to their headphones. With the included belt clip and recessed volume the HV6 is perfect for live applications.

The HV6 includes a removable belt clip installed at the factory. A 1/4" stereo to XLR cable is provided to connect the HV6 to a stereo input.

NOTE: The XLR connector is not for mics or line level signals it is for a headphone level input only. It is also not a balanced input, it is a stereo input (left, right and Ground). Pin 2 is left, pin 3 is right and pin 1 is ground.
